

WARNING!!!! If you take photos with your cell phone

Posted on Aug 14, Posted by [TechwebReality Info](#) Category [What's Happening in Technogy](#)

Smartphone pictures pose privacy risks

This is truly alarming – please take the time to watch. At the end they'll tell you how to set your phone so you don't run this risk!

PLEASE PASS THIS INFO TO ANYONE YOU KNOW WHO TAKES PICTURES WITH THEIR CELL OR SMART PHONE AND POSTS THEM ONLINE.

I want everyone of you to watch this and then be sure to share with all your family and friends.

It's REALLY important info, about what your posting things on your cell phones can do TO YOU!!!

Too much technology out there these days so beware.....

PLEASE TAKE THE TIME TO WATCH THIS VIDEO, AND TAKE THE RECOMMENDED PRECAUTIONS.

If you have children or grandchildren you NEED to watch this. I had no idea this could happen from taking pictures on the blackberry or cell phone. It's scary.
