

How to Fix Joomla 3x Login error

Posted on Aug 04, Posted by [TechwebReality Info](#) Category [Rules](#)

Am sure by Now you are a frustrated person you have gone through the internet and you are wondering why is my joomla login credentials are not going through: You have tried the MD5 trick in the Cpanel and still " zero "

So what do you do?

Simple

Step Number one , go to your Cpanel and look for your configuration.php

The cause of this error is here: Look for this code of line

```
public $cookie_domain = "";
```

Remove the URL (Domain) link inside it.

```
public $cookie_domain = 'www.techwebreality';
```

to

```
public $cookie_domain = '';
```

That is All

Thanks  **like my Facebook page and share this vital information to all joomla developers**

```
public $proxy_enable = '0';
public $proxy_host = '';
public $proxy_port = '';
public $proxy_user = '';
public $proxy_pass = '';
public $session_life = '0';
public $site_debug = '';
public $site_name_page_title = '0';
public $force_ssl = '0';
public $session_attached_server_host = 'localhost';
public $session_attached_server_port = '11111';
public $session_attached_server_host = 'localhost';
public $session_attached_server_port = '11111';
public $frontediting = '1';
public $feed_enabled = 'checked';
public $cookie_domain = '';
public $asset_id = '1';
```
